PURPOSE: The following policy is designed to establish guidelines and procedures for the appropriate, safe, and confidential use of social media.

SCOPE: This policy applies to all CCDCFS staff.

POLICY

CCDCFS (Agency) holds all employees responsible for ensuring that any public communication, including social networking communication, does not negatively impact the reputation of the agency or in any way disparages the children and families we serve (past or present) or its partners or clients.

All Agency policies regarding confidentiality and those policies contained in the Cuyahoga County Employees Handbook should be considered when employees post any information within a social networking environment that may concern the work of the Agency, another employee or any child or family served by the Agency. Information regarding persons receiving services must never be disclosed. The privacy rights of fellow employees must also be respected. This applies to comments posted on blogs, forums, and social media platforms.

CCDCFS encourages all employees to consider the manner and the speed by which information can be relayed using technology and how such information can be misunderstood. Therefore, no one guideline or practice as outlined in this policy can handle every eventuality when dealing with social media. It is expected that staff utilize common sense, consider the Agency's mission and seek guidance when in doubt about their actions prior to posting information on a social media site.

Nothing in this policy should be construed as inhibiting an employee's right to freedom of speech, freedom of association or to engage in discussions which are related to their right to collectively bargain or associate for such purposes.

DEFINITION: Social Media: for the purposes of this policy social media shall be defined as online web-based communities that foster interaction through various means of communications such as wall-posting, chat, messaging and email. Current examples of popular online social networking sites include, but are not limited to, the following: Twitter, Facebook, Instagram, You Tube, and WordPress.

 - a. Secure agreement from their supervisor that the use of social media is warranted.
 - b. Document in the activity log how social media was used and for what purpose, including the outcome.
